AE - Artifact Evaluation

ICSE 2021

About Accepted Research Artifacts People Index Call For Artifact Submissions

Artifacts play a vital role in Software Engineering research and constitute, according to ACM's Artifact Review and Badging policy, a "digital object that was either created by the authors to be used as part of the study or generated by the experiment itself." Artifacts can be software systems, scripts used to run experiments, input datasets, raw data collected in the experiment, or scripts used to analyze results. High quality artifacts of published research papers increase the likelihood that results can be independently replicated and reproduced by other researchers.

In this spirit, the artifacts track aims to review, promote, share, and catalog the research artifacts of accepted software engineering papers. Authors of the papers accepted to the Technical Track can submit an artifact for evaluation as a candidate reusable, available, replicated or reproduced artifact. As previous year, authors of any prior SE work (published at ICSE or elsewhere) are also invited to submit an artifact for evaluation as a candidate replicated or reproduced artifact. The top two artifacts selected by the program committee will be awarded the best artifact awards.

Important Dates

AoE (UTC-12h)

Wed 24 Feb 2021
Artifact Evaluation Acceptance Notification

Fri 22 Jan 2021
Artifact Evaluation Submissions Deadline

Fri 15 Jan 2021
Artifacts Evaluation Pre-submission Registration Deadline
